## Feet, Yards, and Miles

1. Use a tape measure to measure lengths of some objects and distances in feet and inches.

| Item | How long |
| :---: | :---: |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |

2. Draw a long line in the yard and mark on it marks for $1 \mathrm{ft}, 2 \mathrm{ft}, 3 \mathrm{ft}$, and so on, up until at least 20 ft . Walk along your line. First, try to take 1 -foot steps. Then, try to take 2 -foot steps.
Then, try to take 1 -yard steps.
Which kind of steps were the most comfortable and easiest steps for you to take?
3. First, practice taking 2-foot steps. Then measure some distances using your 2-foot steps. For example, measure the width of a street or the length of a room. Lastly figure out the distances in feet.

| Distance | in steps | in feet |
| :---: | :--- | :--- |
|  |  |  |
|  |  |  |
|  |  |  |
