Using the Calendar

The calendar is divided into *weeks*. Each week has seven days. The names of those days are written in a row, from Sunday through Saturday (or sometimes from Monday through Sunday), above the numbers.

March						
Sun	Mon	Tue	Wed	Thu	Fri	Sat
1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	**25**	26	27	28
29	30	31				

The week from the 8th through the 14th is highlighted. It is seven days.

What day is one week after March 18th?
It is the day directly under it on the calendar, March 25th. You could also add seven to the number of the day: $18 + 7 = 25$.

What day is one week after August 25th?

It is September 1st, because it would be directly under the number 25 if we continued writing the days of September in the boxes.

What day is three weeks after August 25th?

You need to "jump" down three rows. First go from August 25th to September 1st on the next calendar, and then two weeks more from there. September 15th is exactly three weeks later than August 25th.

August						
Sun	Mon	Tue	Wed	Thu	Fri	Sat

2	3	4	5	6	7	8
9	10	11	12	13	14	15
16	17	18	19	20	21	22
23	24	25	26	27	28	29
30	31					

September days

What day is six weeks after August 14th?

Go down six rows, but skip from August 28th directly to the first Thursday of September, and then on from there. It is September 25th.

What day is three weeks before September 10th?

One week before that is September 3rd. Go up one more week to August 27th, and then one more to August 20th.

September
